

Item 1 – Cover Page

Form ADV

Part 2A

March 26, 2018

This Brochure provides information about the qualifications and business practices of Kerns Capital Management, Inc. (“KCM”). If you have any questions about the contents of this Brochure, please contact us at (713) 993-0949 or ir@kernscapital.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about Kerns Capital Management, Inc. is also available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2 – Material Changes

This section provides a summary of material updates made to this brochure since its filing on March 21, 2017. The Form ADV Part 2 has been revised as follows:

- Pursuant to an agreement dated November 29, 2017, KCM serves as the Investment Adviser to the KCM Opportunity Fund, LLC (the “KCM Opportunity Fund”), a private investment fund exempt from registration under the Investment Company Act pursuant to Section 3(c)(1) which offers its interests pursuant to Regulation D of the Securities Act of 1933, as amended. The brochure has been revised to reflect provision of advisory services to the KCM Opportunity Fund including descriptions of the management fees and investment strategy of the fund contained in Items 5 and 8 of this brochure, respectively.

A copy of our Brochure may be requested by contacting Marty Kerns, President and Chief Compliance Officer, at (713) 993-0949 or via email at marty@kernscapital.com. Our Brochure is also available for free on our website at www.kernscapital.com.

Item 4 – Advisory Business

This Brochure provides an overview of the investment management services provided by Kerns Capital Management, Inc. (KCM).

KCM provides advisory services to individuals, a mutual fund registered under the Investment Company Act of 1940, as amended (the “Investment Company Act”) and a private fund exempt from registration under the Investment Company Act pursuant to Section 3(c)(1) offering interests under Regulation D of the Securities Act of 1933. In this Brochure, the mutual fund and the private fund are referred to together as “Funds,” and individually as a “Fund.” This Brochure is not an offering document for the Funds, and all descriptions of the Funds and their objectives, strategies, and risks are set forth in their entirety by the Prospectus and Statement of Additional Information for the mutual fund and the Private Placement Memorandum for the private fund.

Affiliated Private Funds. As noted above, KCM is adviser to and affiliated with the KCM Opportunity Fund (the “affiliated fund”). A condensed description of the fund (the complete description of the terms, conditions, risks and fees (including incentive compensation) associated with the affiliated fund) is set forth in the affiliated fund’s offering documents. KCM, on a non-discretionary basis, may recommend that qualified clients consider allocating a portion of their investment assets to the affiliated fund. The terms and conditions for participation in the affiliated fund, including management and incentive fees, conflicts of interest, and risk factors, are set forth in the fund’s offering documents. Registrant’s clients are under absolutely no obligation to consider or make an investment in a private investment fund.

Please Note: Private investment funds generally involve various risk factors, including, but not limited to, potential for complete loss of principal, liquidity constraints and lack of transparency, a complete discussion of which is set forth in each fund’s offering documents, which will be provided to each client for review and consideration. Unlike liquid investments that a client may maintain, private investment funds do not provide daily liquidity or pricing. Each prospective client investor will be required to complete a Subscription Agreement, pursuant to which the client shall establish that he/she is qualified for investment in the fund, and acknowledges and accepts the various risk factors that are associated with such an investment.

Please Also Note: Valuation. In the event that the Registrant references private investment funds owned by the client on any supplemental account reports prepared by KCM, the value(s) for all private investment funds owned by the client shall reflect the most recent valuation provided by the fund sponsor. If the fund sponsor does not provide a post-purchase valuation, then the valuation shall reflect the initial purchase price (and/or a value as of a previous date) or the current value(s) (either the initial purchase price and/or the most recent valuation provided by the fund sponsor). If the valuation reflects the initial purchase price (and/or a value as of a previous date), then the current value(s) (to the extent ascertainable) **could be significantly more or less than the original purchase price.** The client’s advisory fee shall be based upon such reflected fund value(s).

Please Also Note: Conflict of Interest. Because KCM and/or its affiliates can earn compensation from the affiliated private fund (both management fees and incentive compensation) that may exceed the fee that the Registrant would earn under its standard asset based fee schedule referenced in Item 5 below, the recommendation that a client become a Fund investor presents a **conflict of interest**. No client is under any obligation to become a Fund investor. **The Registrant's Chief Compliance Officer, Marty Kerns, remains available to address any questions regarding this conflict of interest.**

KCM is an independent, fee-based, SEC-Registered Investment Advisor. The firm was founded in 1996 by M. Lane Kerns. Martin ("Marty") L. Kerns, II acquired KCM in 2012 and is the firm's President, Chief Executive Officer, and Chief Compliance Officer. He is the firm's sole shareholder.

A copy of KCM's written Brochure as set forth on Part 2 of Form ADV shall be provided to each client prior to, or contemporaneously with, the execution of the Agreement.

As of March 8, 2018, KCM manages client assets of \$241,440,184 on a discretionary basis.

Item 5 – Fees & Compensation

1. Management Fees

Generally, KCM charges fees based on a percentage of assets under management.

Funds

KCM's advisory fees are set forth in each Fund's prospectus or other offering document. Fees are billed either monthly (in the case of the private fund) or quarterly, in arrears, and are deducted from the Fund's assets. A pro rata management fee will be charged to private fund members on any amounts permitted to be invested during any month. The management fee paid by each fund varies between 1.00% and 2.00% per annum of the net asset value of the Fund. In addition, the Funds may have more than one class of interests, each of which may pay a different management fee. With respect to the private fund, the management fee paid in relation to Founders class shares is approximately 1.25% annually. With respect to Flagship class shares, management fee is approximately 1.5% annually. No part of the private fund management fee is refunded in the event that an investor withdraws all or any of the value in the investor's capital account during a month. In certain circumstances, KCM may pay a portion of the management fee to other advisers. The KCM Opportunity Fund managed by KCM is also charged a performance fee.

Individual Clients

Client advisory fees are based on the value of the account on the last day of the month and are billed either monthly or quarterly, in arrears, as set forth in the Investment Advisory Agreement. Fees are deducted from the client's account when possible. KCM's annual investment management fee ranges from 1.0% to 2.0%, with a minimum annual fee of \$2,500.

Cash Positions. At any specific point in time, depending upon perceived or anticipated market conditions/events (there being no guarantee that such anticipated market conditions/events will occur),

KCM may maintain cash positions for defensive purposes. All cash positions (money markets, etc.) shall be included as part of assets under management for purposes of calculating KCM's advisory fee.

Fee Differentials. Fees are negotiable and may vary by client depending upon various objective and subjective factors, including but not limited to: the representative assigned to the account, the amount of assets to be invested, the complexity of the engagement, the anticipated number of meetings and servicing needs, related accounts, future earning capacity, anticipated future additional assets, and negotiations with the client. Thus, similar clients could pay different fees, which will correspondingly impact a client's net account performance. Moreover, the services to be provided by KCM to any particular client could be available from other advisors at lower fees. All clients and prospective clients should be guided accordingly.

KCM's advisory fees are exclusive of brokerage commissions, transaction fees, and other related costs and expenses which shall be incurred by the Client. Clients may incur certain charges imposed by custodians, brokers, third-party investment and other third-parties such as fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual funds and exchange traded funds also charge internal fees, which are disclosed in a fund's prospectus. These charges, fees and commissions are exclusive of and in addition to KCM's fee, and KCM shall not receive any portion of those commissions, fees, and costs, unless otherwise disclosed.

2. Other Fees.

KCM is the Investment Advisor to a mutual fund, the KCM Macro Trends Fund, and a private fund, the KCM Opportunity Fund. KCM receives a management fee from each Fund for its advisory services. KCM may elect to invest all or a significant portion of a client's assets in KCM Macro Trends Fund in which case any management fee received on a client's assets invested in a Fund, less any platform expenses incurred by KCM, will be applied dollar-for-dollar to reduce KCM's management fee charged to the Client. With respect to the private fund, KCM will not charge a client account level asset based fee where the client is also paying a fee as a fund shareholder.

3. Termination.

Accounts initiated or terminated during the billing period will be charged a prorated fee. Upon termination of any account, any prepaid, unearned fees will be promptly refunded, and any earned, unpaid fees will be due and payable. Individual clients have the right to terminate the Investment Advisory Agreement without penalty within five business days after entering into the agreement.

Item 6 – Performance-Based Fees & Side-By-Side Management

1. Funds.

KCM manages funds that charge asset-based fees and funds that charge both an asset-based fee and a performance fee. In such cases, KCM may have an incentive to allocate certain investment opportunities to funds that have a performance fee in order to increase the account's performance and thus improve KCM's chances of receiving the performance fee. KCM has implemented policies and procedures to assure investment opportunities are allocated equitably between the funds and other accounts with similar investment strategies.

As described in Item 5, KCM may receive a performance-based fee from the KCM Opportunity Fund in addition to a management fee. The amount and manner in which performance fees are assessed by KCM are based on contractually specified percentages set forth in the private placement memorandum or prospectus. In addition, a Fund may have more than one class of interests, each of which may pay a different performance fee. The performance fee paid by the KCM Opportunity Fund to KCM at the close of each fiscal year varies between 10.00% and 15.00% of the its annual new appreciation, depending on the member's class. All such arrangements conform with Section 205(a)(1) of the Advisers Act and ERISA, as applicable.

2. Individual Clients

Performance-based fees may only be offered to clients who meet one of the following criteria:

- (a) A natural person who or a company that immediately after entering into the contract has at least \$1,000,000 under the management of the investment adviser;
- (b) A natural person who or a company that the investment adviser entering into the contract (and any person acting on his behalf) reasonably believes, immediately prior to entering into the contract, either (1) has a net worth (together, in the case of a natural person, with assets held jointly with a spouse, excluding principal residence) of more than \$2,100,000, at the time the contract is entered into; or (2) is a qualified purchaser as defined in section 2(a)(51)(AA) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(51)(A)) at the time the contract is entered into; or
- (c) A natural person who immediately prior to entering into the contract is: (1) an executive officer, director, trustee, general partner, or person serving in similar capacity of the investment adviser; or (2) An employee of the investment adviser other than an employee performing solely clerical, secretarial, or administrative functions with regard to the investment adviser) who, in connection with his or her regular functions or duties, participates in the investment activities of such investment adviser, provided that such employee has been performing such functions and duties for or on behalf of the investment adviser, or substantially similar functions or duties for or on behalf of another company for at least 12 months.

Item 7 – Types of Clients

KCM provides services to individuals, mutual funds, hedge funds, trusts and foundations.

To open an account with us for individual portfolio management services, we typically require a minimum account size of \$250,000. We will aggregate client accounts for purposes of this requirement.

Investors in the KCM Opportunity Fund must meet a minimum initial investment requirement ranging from \$500,000-\$1,000,000, depending upon the class of interests subscribed for.

Retirement Rollovers-Potential for Conflict of Interest: A client or prospective client leaving an employer typically has four options regarding an existing retirement plan (and may engage in a combination of these options): (i) leave the money in the former employer's plan, if permitted, (ii) roll over the assets to the new employer's plan, if one is available and rollovers are permitted, (iii) roll over to an Individual

Retirement Account (“IRA”), or (iv) cash out the account value (which could, depending upon the client’s age, result in adverse tax consequences). If KCM recommends that a client roll over their retirement plan assets into an account to be managed by KCM, such a recommendation creates a conflict of interest if KCM will earn an advisory fee on the rolled over assets. No client is under any obligation to roll over retirement plan assets to an account managed by KCM. KCM’s Chief Compliance Officer, Marty Kerns, remains available to address any questions that a client or prospective client may have regarding the potential for conflict of interest presented by such rollover recommendation.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

1. Methods of Analysis & Investment Strategies

- **Introduction**

KCM investment philosophy centers around active management. The goal of all KCM strategies is long-term growth of capital. As a secondary goal, KCM’s strategies seek to manage volatility and control risk.

KCM is a contrarian, value-oriented investor in long-short equity, credit and volatility. We use fundamental, technical and quantitative analysis in security selection, and invest principally in domestic equities (common stock), exchange-listed foreign equities (American Depository Receipts), exchange-traded funds (“ETFs”) and open-ended mutual funds.

- **Investment Strategies**

The descriptions of strategies below, as applied to a particular Fund, are qualified in their entirety by the Fund’s prospectus, Key Investor Information Document, or other offering document.

KCM Macro Trends Fund

The KCM Macro Trends Fund is a long/short, equity-focused, liquid alternative investment strategy, and is available in SMA or mutual fund structure. The fund’s flexible mandate gives it the ability to invest globally in a wide variety of asset classes, company sizes, industries and equity types (growth vs. value), with a focus on Russell 1000 constituents. The fund can also short in an effort to control market risk and manage volatility. Quantitative, top-down hedging and bottoms-up stock picking tools are used to select securities and manage risk. The fund invests principally in domestic and foreign equity securities (common stock) and exchange-traded funds (ETFs). As a part of our investment strategy and during periods in which we have limited market exposure, we may invest in money market funds or other short-term interest-bearing instruments. Please see the prospectus of the KCM Macro Trends Fund for a full description of the investment strategy employed on behalf of the fund.

KCM Opportunity Fund

The KCM Opportunity Fund is a long/short equity hedge fund. The fund’s flexible mandate gives it the ability to invest globally in companies of all sizes, industries and equity types (growth vs. value), with a focus on Russell 1000 constituents. The fund uses leverage to accentuate market moves, and shorts in an effort to profit, manage tail risk and reduce volatility. Quantitative, top-down hedging and bottoms-up stock picking tools are used to select securities and manage risk. The fund invests principally in domestic

and foreign equity securities (common stock), futures and options. Please see the private placement memorandum of the KCM Opportunity Fund for a full description of the investment strategy employed on behalf of the fund.

Separately Managed Accounts

KCM offers several managed account strategies, including long equity, long/short equity, long credit and volatility. These strategies are all quantitative in operation with their primary focus being long-term growth of capital. We use stocks and ETFs in the management of these accounts.

Risk-Based Model Portfolios

KCM also offers a suite of risk-based asset allocation models. We allocate tactically to mutual funds and ETFs in the management of these models which have as their objective:

Stable: Emphasis on preservation of capital with current return in excess of money market rates and inflation, while seeking to not decline in value more than 1.00% in any month. Little consideration is placed on growth of capital. The portfolio may invest in all asset types, both domestic and international.

Conservative: An investment portfolio with conservative objectives is characterized by risk aversion. Minimizing volatility is a clear priority over growth. A Conservative portfolio may be appropriate for persons with a relatively short time horizon (under 5 years), with a need for more predictable income or, notwithstanding a longer time horizon, with a high sensitivity to short-term volatility. Over time, portfolios with a Conservative objective can be expected to produce low average total returns on investment but have relatively low volatility. Investors with a Conservative objective are willing to sacrifice substantial return potential for long-term capital preservation. The portfolio may invest in all asset types, both domestic and international.

Moderate: An investment portfolio characterized by moderate risk. The main objective is to achieve steady portfolio growth while limiting fluctuations in the value of the portfolio to less than those of the overall equity markets. This objective is for a client who accepts a fair degree of risk and is looking to exceed long-term inflation by a fair margin (e.g., 3-5% over the long term). The investor understands, and is comfortable with the fact, that short-term volatility is expected in achieving higher long-term returns. The portfolio may invest in all asset types, both domestic and international.

Aggressive: An investment portfolio characterized by high risk. The Aggressive model is for an investor looking to exceed long-term inflation by a high margin and who can accept a high degree of short-term volatility. It is for the investor seeking high growth over a very long-term time horizon (greater than 10 years). This portfolio may have substantial fluctuations in value greater than overall equity markets. The portfolio may invest in all asset types, both domestic and international.

- **Risk of Loss**

Investing in securities involves risk of loss that clients should be prepared to bear.

Mutual Fund & Exchange-Traded Fund Risk. There are specific risks involved in the management of mutual funds and Exchange-Traded Funds (collectively “funds”) which are described in detail in their prospectus. Each fund exposes KCM’s strategies to the strategy-specific risk of that fund and the value of your portfolio will fluctuate in response to the performance of the funds in which your account is invested.

Market Risk. Stock markets can be volatile. In other words, the prices of stocks can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions. Investments may decline in value if the stock markets perform poorly. There is also a risk that the investments will underperform either the securities markets generally or particular segments of the securities markets.

Portfolio Turnover Risk. Portfolio turnover refers to the rate at which investments are replaced. The higher the rate, the higher the transactional and brokerage costs associated with the turnover which may reduce the return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase your realized capital gains or losses, which may affect the taxes you pay.

Foreign Risk. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. Special risks associated with investments in foreign companies include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political instability and differing auditing and legal standards.

Small and Medium-Size Company Risk. Small and medium size companies may have narrower markets and more limited managerial and financial resources than do larger, more established companies. Thus, their performances can be more volatile and they may face a greater risk of business failure.

Issuer-Specific Risk. The value of a specific security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of securities of smaller issuers can be more volatile than that of larger issuers. The value of certain types of securities can be more volatile due to increased sensitivity to adverse issuer, political, regulatory, market, or economic developments.

Short Selling Risk. Positions (purchases) in shorted securities are speculative and riskier than “long” positions (purchases) because the cost of the replacement security is unknown. Therefore, the potential loss on the short sale is unlimited, whereas the potential loss on long positions is limited to the original purchase price. Any strategy that includes selling securities short could suffer significant losses. Short selling will also result in higher transaction costs (such as interest and dividends), which reduce return, and may result in higher taxes.

Derivatives Risk. Investments in futures and options are considered “derivative” investments. A small investment in derivatives could have a potentially large impact on performance. The use of derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in the underlying assets. Derivatives can be highly volatile, illiquid and difficult to value, and there is the risk that the hedging technique will fail if changes in the value of a derivative held do not correlate with the portfolio securities being hedged.

Put and Call Options Risk. There are risks associated with the sale and purchase of call and put options. As seller (writer) of a covered call option, assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. If the option is uncovered, and the Seller must purchase the security at the current market price because the option is exercised, the loss could be significant. The buyer of a put or call option risks losing the entire premium invested in the option if they do not exercise the option.

Leverage Risk. The KCM Opportunity Fund will seek to use external leverage to achieve its investment objectives. The use of leverage may increase the KCM Opportunity Fund's exposure to long securities positions and make any change in the KCM Opportunity Fund's net asset value greater than it would be without the use of leverage. This could result in increased volatility of returns. If there is a net decrease or increase in the value of the KCM Opportunity Fund's investment portfolio, leverage will decrease or increase, as the case may be, the net asset value per common share to a greater extent. While such strategies and techniques increase the opportunity to achieve higher returns on the amounts invested, they also increase the risk of loss. To the extent the Kerns Opportunity Fund purchases securities with borrowed funds, its net assets will tend to increase or decrease at a greater rate than if borrowed funds are not used.

Item 9 – Disciplinary Information

None.

Item 10 – Other Financial Industry Activities and Affiliates

- **Investment Adviser to Other Funds**

KCM is the Investment Advisor to the KCM Macro Trends Fund, an investment company (“mutual fund”) registered under the Investment Company Act of 1940. See Item 11 below for additional information.

- **Investment Adviser Representative of Other Investment Adviser Firm.**

Marty Kerns, KCM's President and Chief Executive Officer, also serves as an investment adviser representative of Pensionmark Financial Group, LLC, (“Pensionmark”) an unaffiliated SEC-registered investment adviser firm. KCM may refer certain clients to Pensionmark for ERISA retirement plan services. No client is under any obligation to engage the services of Pensionmark.

- **Private Investment Funds.**

As discussed above, KCM provides investment advice to an affiliated fund. The general partner of the affiliated fund, Kerns Hedge Partners, LLC is affiliated with KCM by common ownership. KCM, on a non-discretionary basis, may recommend that qualified clients consider allocating a portion of their investment assets to the affiliated fund. The terms and conditions for participation in the affiliated fund, including management and incentive fees, conflicts of interest, and risk factors, are set forth in the fund's offering documents. Please Also Note: Conflict of Interest. Because KCM and/or its affiliate and earn compensation from the affiliated funds (both management fees and incentive compensation) that may exceed the fee that KCM would earn under its standard arrangements the recommendation that a client become an affiliated funds investor presents a conflict of interest. No client is under any obligation to

become an affiliated funds investor. KCM's Chief Compliance Officer, Martin L. Kerns, remains available to address any questions regarding this conflict of interest.

Item 11 – Code of Ethics

KCM has adopted a Code of Ethics for all supervised persons of the firm describing its high standard of business conduct and fiduciary duty to its clients. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, restrictions on the acceptance of significant gifts and the reporting of certain gifts and business entertainment items, and personal securities trading procedures, among other things. All supervised persons at KCM must acknowledge the terms of the Code of Ethics annually, or as amended.

KCM anticipates that, in appropriate circumstances, and consistent with client's investment objectives, it will cause accounts over which KCM has management authority to effect, or will recommend to investment advisory clients or prospective clients, the purchase or sale of securities in which KCM, its affiliates and/or clients, directly or indirectly, have a position of interest.

As previously described, KCM is the Investment Advisor to the KCM Macro Trends Fund, a registered mutual fund, and the KCM Opportunity Fund, a private fund and receives a management fee for its advisory services (and performance fee, in the instance of KCM Opportunity Fund). KCM may elect to invest all or a significant portion of a client's assets in the KCM Macro Trends Fund or the KCM Opportunity Fund. This practice presents a conflict of interest because it gives KCM an incentive to invest client assets in the fund based on additional compensation received rather than client needs. KCM will address this conflict by offsetting, against our regular management fee, any amounts earned or otherwise received from the management fee charged to KCM Macro Trends Fund. With respect to the KCM Opportunity Fund, KCM will not charge an asset based client level fee so that KCM's compensation will not be increased by investing in the Funds.

As disclosed above, KCM and/or its affiliates have a financial interest in the affiliated private fund. KCM, on a non-discretionary basis, may recommend that qualified clients consider allocating a portion of their investment assets to the affiliated funds. The terms and conditions for participation in the affiliated funds, including management and incentive fees, conflicts of interest, and risk factors, are set forth in the affiliated funds' offering documents. **KCM's Chief Compliance Officer, Martin L. Kerns, remains available to address any questions regarding this conflict of interest**

KCM's employees and persons associated with KCM are required to follow KCM's Code of Ethics. Subject to satisfying this policy and applicable laws, officers, directors and employees of KCM may trade for their own accounts in securities which are recommended to and/or purchased for KCM's clients. The Code of Ethics, which prohibits "front running" and provides that trades for the firm and trades for employees of the firm may occur only simultaneously with or after trades are placed for clients in the same security, is designed to assure that the personal securities transactions, activities and interests of the employees of KCM will not interfere with (i) making decisions in the best interest of advisory clients and (ii) implementing such decisions while, at the same time, allowing employees to invest for their own accounts. Nonetheless, because the Code of Ethics in some circumstances would permit employees to invest in the same securities as clients, there is a possibility that employees might benefit from market activity by a client in a security held by an employee. Employee trading is continually monitored under the Code of Ethics, and to reasonably prevent conflicts of interest between KCM and its clients.

Item 12 – Brokerage Practices

The Custodians and Brokers We Use

We generally recommend that our individual clients use TD Ameritrade Institutional (“TDA”), Charles Schwab & Co., Inc. (“Schwab”), or Interactive Brokers Group, Inc. (“Interactive Brokers”). KCM is independently owned and operated and is not affiliated with TDA, Schwab, or Interactive Brokers.

TD Ameritrade Institutional is a division of TD Ameritrade Inc., member FINRA/SIPC (“TDA”), an unaffiliated SEC-registered broker-dealer and FINRA member.

KCM participates in the institutional advisor programs (the “Program”) offered by TD Ameritrade Institutional and Schwab Advisor Services™ (formerly called Schwab Institutional®) (“Schwab”).

TDA and Schwab offer services to independent investment advisors which include custody of securities, trade execution, clearance and settlement of transactions. Advisor receives benefits from TDA and Schwab through its participation in the Program.

The introducing prime broker used by KCM Opportunity Fund is Cowen Prime Services, LLC. The custodian for the fund is Goldman Sachs & Co. LLC

How We Select Brokers/Custodians

We seek to recommend a custodian/broker who will hold your assets and execute transactions on terms that are most advantageous overall when compared to other available providers and their services. We consider a wide range of factors, including among others:

- Combination of transaction execution services and asset custody services (generally without a separate fee for custody)
- Capability to execute, clear, and settle trades (buy and sell securities for your account)
- Capability to facilitate transfers and payments to and from accounts (wire transfers, check requests, bill payment, etc.)
- Breadth of available investment products (stocks, bonds, mutual funds, exchange-traded funds, etc.)
- Availability of investment research and tools that assist in making investment decisions
- Quality of services
- Competitiveness of the price of services (commission rates, margin interest rates, other fees, etc.) and willingness to negotiate the prices
- Reputation, financial strength and stability
- Prior service to us and our clients
- Availability of other products and services that benefit us, as discussed below

Brokerage and Custody Costs

TDA, Schwab, and Interactive Brokers generally do not charge you separately for custody services but are compensated by charging you commissions or other fees on trades that it executes or that you settle into your account.

We generally trade no-load mutual funds in client accounts. There is no commission or fee expense for you associated with trading no-load mutual funds. Commissions and fees are paid to the custodian by the fund company for access to their platform and your account, which is a benefit to you.

In addition to the commission and asset-based fees, TDA, Schwab, or Interactive Brokers may charge you a flat dollar amount as a “Prime Broker” or “trade away” fee for each trade that we have executed by a different broker but where the securities bought or the funds from the securities sold are deposited (settled) into your account. These fees are in addition to the commissions or other compensation you pay the executing broker-dealer. Because of this, to minimize your trading costs, we have TDA, Schwab, or Interactive Brokers execute most trades for your account. We have determined that having them execute most trades is consistent with our duty to seek “best execution” of your trades. Best execution means the most favorable terms for a transaction based on all relevant factors, including those listed above (see “How We Select Brokers/Custodians”).

Client Directed Brokerage. If the client directs that trades be executed through another broker-dealer, the client is responsible for negotiating the terms and conditions (including, but not limited to, commission rates) relating to all services to be provided by that broker-dealer. KCM will assume no responsibility for obtaining the “best execution” of your trade through another broker-dealer.

Products and Services Available to us from TDA, Schwab, and Interactive Brokers

TDA, Schwab, and Interactive Brokers (collectively “the Custodians”) serve independent investment advisory firms such as KCM. They provide us and our clients with access to institutional brokerage-trading, custody, reporting and related services – many of which are not typically available to retail customers. They also make available various support services. Some of those services help us manage or administer our clients’ accounts, while other services help us manage and grow our business. Their support services are generally available on an unsolicited basis (we don’t have to request them) and are at no charge to us.

Services That Benefit You. Custodian institutional brokerage services include access to a broad range of investment products, execution of securities transactions, monthly statements, and custody of client assets. The investment products available through the Custodians include some products we might not otherwise have access or that would require a significantly higher minimum initial investment by our clients. These services generally benefit you and your account.

Services That May Not Directly Benefit You. The Custodian may also make available to us other products and services that benefit us but may not directly benefit you and your account. These products and services assist us in managing and administering our clients’ accounts. They include investment research, including their own and that of third parties. We may use this research to service all or a substantial number of our clients’ accounts, including accounts not maintained at the Custodians. In addition to investment research, TDA, Schwab, and Interactive Brokers also make available software and other technology that:

- Provide access to client account data (such as duplicate trade confirmations and account statements)
- Facilitate trade execution and allocate aggregated trade orders for multiple client accounts
- Provide pricing and other market data

-
- Facilitate payment of our fees from our clients' accounts
 - Assist with back-office functions, recordkeeping, and client reporting

Services That Generally Benefit Only Us. The Custodians also offer other services intended to help us manage and further develop our business enterprise. These services include:

- Educational conferences and events
- Consulting on technology, compliance, legal and business needs
- Publications and conferences on practice management and business succession
- Access to employee benefits providers, human capital consultants and insurance providers

The Custodians may provide some of these services without cost, or at a discount. In other cases, they will arrange for third-party vendors to provide the services to us. They may also discount or waive their fees for some of these services or pay all or a part of a third-party's fees. The Custodians also provide us with other benefits, such as occasional business entertainment for our personnel.

Soft Dollar Benefits

KCM Macro Trends Fund

Cowen Execution Services and WallachBeth Capital (collectively "Brokers") provide prime brokerage services, including trade execution, to the KCM Macro Trends Fund. KCM, in its management of the fund, receives research or other products and services other than execution ("soft dollar benefits") from Brokers in connection with security transactions for the Fund.

Brokers, pursuant to their client commission program, have established a pool of credits based on commissions for trades routed by KCM for execution by Brokers on behalf of the Fund. The credit rate for executions is \$0.0040 for equities and \$.50 for options contracts. At KCM's request, Brokers use the credits to pay for "research" services as defined in Section 28(e) of the Securities Exchange Act of 1934 that have been or will be used by KCM in the investment decision-making process for the Fund.

In the last year, KCM has used these credits to pay for proprietary research created and developed by leading service providers including Bloomberg. This research assists us in investment decision-making and trade execution. Brokers review and pay for these research services directly.

KCM Opportunity Fund

In addition, with the consent of KCM Opportunity Fund's investment adviser, KCM may utilize soft dollar credits.

The use of soft dollars must conform with the safe harbor found in Section 28(e) of the Securities Exchange Act of 1934. When KCM uses soft dollar benefits to obtain research or other products or services, it receives a benefit because it does not have to produce or pay for the research, products or services. This benefit may provide us with the incentive to select a broker-dealer based on our interest in receiving the research or other products or services rather than based on the Fund's investors receiving the most favorable execution. This is a conflict of interest. KCM believes, however, that its selection of Brokers, and receipt of soft dollar benefits, is in the best interests of the fund's investors.

KCM's use of soft dollar benefits received from Brokers is limited to our management of the Funds.

Directed Brokerage

KCM does not generally accept directed brokerage arrangements (when a client requires that account transactions be effected through a specific broker-dealer). In such client-directed arrangements, the client will negotiate terms and arrangements for their account with that broker-dealer, and KCM will not seek better execution services or prices from other broker-dealers or be able to "batch" the client's transactions for execution through other broker-dealers with orders for other accounts managed by KCM. Thus, a client may pay higher commissions or other transaction costs or greater spreads, or receive less favorable net prices on transactions for the account than would otherwise be the case. If the client directs KCM to effect securities transactions for the client's accounts through a specific broker-dealer, the client acknowledges that such direction may cause the accounts to incur higher commissions or transaction costs than the accounts would otherwise incur had the client determined to effect account transactions through alternative clearing arrangements that may be available through KCM. Higher transaction costs adversely impact account performance. Transactions for directed accounts will generally be executed following the execution of transactions for non-directed accounts.

Item 13 – Review of Accounts

Marty Kerns reviews client accounts on a quarterly basis. For accounts with balances of \$100,000 or more, KCM provides written quarterly reports that include account balance, performance and fee information.

Client Obligations. In performing its services, KCM shall not be required to verify any information received from the client or from the client's other professionals, and is expressly authorized to rely thereon. Moreover, each client is advised that it remains their responsibility to promptly notify KCM if there is any change in their financial situation or investment objectives for the purpose of reviewing, evaluating or revising KCM's previous recommendations or services.

Item 14 – Client Referrals and Other Compensation

KCM may compensate third parties for client referrals. Clients whose accounts are the subject of referral fees will receive full written disclosure, in advance, of the terms of the referral arrangement.

As disclosed under Item 12, above, KCM participates in the institutional customer programs of TDA, Schwab, and Interactive Brokers (collectively, "Custodians"), and Advisor may recommend Custodians to Clients for custody and brokerage services. There is no direct link between KCM's participation in the program and the investment advice it gives to its Clients, although KCM receives economic benefits through its participation in the programs that are typically not available to retail investors.

These benefits include the following products and services provided without cost, or at a discount: receipt of duplicate Client statements and confirmations; research-related products and tools; consulting services; access to a trading desk servicing Advisor participants; access to block trading (provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to Client accounts); the ability to have advisory fees deducted directly from Client accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing,

research, technology, and practice management products or services provided to KCM by third-party vendors.

Custodians may have paid for business consulting and professional services received by KCM's related persons.

Some of the products and services made available by Custodians may benefit KCM but may not benefit its Client accounts. These products or services may assist KCM in managing and administering Client accounts, including accounts not maintained at Custodians. Other services made available by Custodians are intended to help KCM manage and further develop its business enterprise.

The benefits received by KCM or its personnel through participation in the Program do not depend on the amount of brokerage transactions directed to Custodians. As part of its fiduciary duties to clients, KCM endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by KCM or its related persons in and of itself creates a potential conflict of interest and may indirectly influence KCM's choice of Custodians for custody and brokerage services.

Item 15 - Custody

Under government regulations, we are deemed to have custody of your assets if, for example, you authorize us to instruct your broker-dealer, bank or other qualified custodian, *e.g.*, TDA, Schwab, or Interactive Brokers (collectively called "custodian"), to deduct our advisory fees directly from your account. Your custodian, however, maintains actual custody of your assets. You will receive an account statement directly from your custodian at least quarterly. They will be sent to the email or postal mailing address you provided to the custodian. You should carefully review these statements promptly when you receive them. KCM urges you to carefully review such statements and compare such official custodial records to the account statements you receive from us. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities.

KCM does not maintain custody of the KCM Fund's assets. In addition, KCM does not act in a capacity that gives KCM access to the Kerns Opportunity Fund's assets. Notwithstanding the foregoing, the KCM Opportunity Fund's assets are maintained with a qualified custodian (Goldman Sachs) and the KCM Opportunity Fund has engaged an independent certified accountant to conduct annual financial audit, prepared in accordance with U.S. Generally Accepted Accounting Principles ("GAAP"). As soon as possible after the end of each fiscal year, the Kerns Opportunity Fund will provide to its investors a report setting forth a balance sheet of the Kerns Opportunity Fund, a profit and loss statement showing the results of operations of the Kerns Opportunity Fund and its net capital appreciation or net capital depreciation, which shall be accompanied by a statement of such investor's capital account and the manner of its calculation and the fund percentage as of the end of the prior fiscal year. After the end of each fiscal year, each investor will be furnished with the required tax information for preparation of their respective tax returns.

Item 16 – Investment Discretion

KCM manages money on a discretionary basis. Clients opening discretionary accounts are required to execute an Investment Advisory Agreement and limited power of attorney that, among other things,

grants us authority to manage their assets on a discretionary basis, meaning we have the authority to select the identity and amount of securities to be bought or sold in the clients' account. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objective for the particular client account.

Investors of the Kerns Opportunity Fund must execute a subscription agreement, limited liability operating agreement or similar document in which they make various representations, including representations regarding their suitability to invest in a high-risk investment pool, and grants a power of attorney. In addition, the sub-advisory agreement with the investment adviser of the Kerns Opportunity Fund grants KCM with discretion to manage the assets of such fund on a discretionary basis.

As stated above in Item 4, clients may generally not impose restrictions on investing in certain securities or types of securities.

When selecting securities and determining amounts, KCM observes the investment policies, limitations and restrictions of the clients for which it advises, if any. For registered investment companies, KCM's authority to trade securities may also be limited by certain federal statutes rather than based on your interest in receiving the best value in custody services and the most favorable execution of your transactions. This is a potential conflict of interest. We believe, however, that our selection of a particular custodian and/or broker is in the best interests of our client.

Item 17 – Voting Securities

With the exception of the KCM Macro Trends Fund and the Kerns Opportunity Fund, KCM does not vote proxies on behalf of clients. Clients retain the responsibility for receiving and voting proxies for any and all securities maintained in client portfolios. Proxies are mailed or electronically delivered by the Custodian directly to each client.

KCM votes proxies for the KCM Macro Trends Fund and the KCM Opportunity Fund in accordance with its policies and procedures in place for voting of proxies (the "Proxy Voting Policy"), which are designed to ensure compliance with Rule 206(4)-6 of the Advisers Act. Clients may obtain a copy of our proxy voting policies and procedures upon request. Under the Proxy Voting Policy, KCM will vote proxies on behalf of its clients based on a determination of the best interest of its clients, consistent with the objective of maximizing long-term investment returns.

KCM may be subject to conflicts of interest in the voting of proxies. A potential conflict of interest may occur where KCM or any of its affiliates or their respective employees has a direct or indirect economic stake in the outcome of a proxy vote that is different from a client's stake. When such a potential conflict may arise the matter is evaluated by the Chief Compliance Officer to determine whether an actual conflict exists. Where an actual conflict exists, KCM will take necessary and appropriate steps to address the conflict.

KCM maintains records for all proxies voted. As required by Rule 204-2(c) under the Advisers Act, KCM's proxy voting records will include: (i) a copy of its Proxy Policy; (ii) a copy of any document created by KCM that was material to making a decision on how to vote proxies on behalf of a client or that memorializes the basis for that decision; and (iii) each written client request for proxy voting records and KCM's written response to any (written or oral) client request for such records. KCM will either maintain its own proxy

statements and records of votes cast or, as permitted by Rule 204-2(c), such records may be maintained by a third-party service provider.

Item 18 – Financial Information

KCM has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.

Brochure Supplement – Martin L. Kerns, II

Item 1 – Cover Page

Martin L. Kerns, II
Kerns Capital Management, Inc.
9821 Katy Freeway, Suite 400
Houston, TX 77024
